

Yamini Dasu.

I build pipelines that scale, dashboards people actually use, and governance systems that survive FDA audits.

FDA audit passed, zero findings

P. 01 — COVER STORY

A LITTLE ABOUT ME

Senior Data Analyst with 5+ years building data infrastructure that moves the needle. From FDA audit-ready pipelines at a medical device company to petabyte-scale data warehouses at a global semiconductor firm — I turn messy, manual processes into clean, governed, automated systems that executives trust.

P. 05 — EDUCATION

WHERE I STUDIED

B.S. Computer Engineering
Minor in Applied Mathematics

California State University,
Sacramento
May 2020

"MY DATA INFRASTRUCTURE HELD UP UNDER FULL FDA REGULATORY SCRUTINY. ZERO FINDINGS."

— Nevro Corp, 2024 Audit

Excel

PLATFORMS

Snowflake

Databricks

AWS

GCP

PRACTICES

ETL Pipelines

Data Governance

KPI Dev

Audit Compliance

P. 03 — CAREER RETROSPECTIVE

MY CAREER SO FAR

DATA ANALYST — WINDFALL

Mar 2026 – Present

San Francisco Bay Area

- I'm building ETL pipelines and data governance workflows for people and donor wealth analytics.
- I collaborate cross-functionally to standardize data definitions and improve reporting consistency.

DATA ANALYST — NEVRO CORP

Jan 2024 – Jul 2025

San Francisco Bay Area

- I automated FDA regulatory pipelines, cutting prep time by 80% — from several weeks to under one week.
- My data infrastructure passed a major FDA audit with zero findings.
- I built 10–12 Tableau dashboards for 4–5 internal teams and executive stakeholders.
- I defined 5–6 KPIs per month alongside Quality, Compliance, IT, and Ops teams.
- I created SOPs and data dictionaries to strengthen audit traceability.

DATA ANALYST — QUALCOMM

Jul 2020 – Oct 2023

San Diego, CA

- I scaled ETL pipelines from ~2TB to petabyte-level on AWS and automated 20+ project onboardings per week.
- I saved 20+ hours/week for 100+ team members by automating 35+ recurring reports.
- I built 35+ Power BI dashboards for global ops teams across the US and India.
- I built scalable SQL and Python pipelines integrating enterprise systems into curated Snowflake datasets.
